NRUTHASABESAN SUNDARA MURTHY

PROJECT MANAGEMENT · INNOVATIONS · BUSINESS ANALYSIS · BUSINESS DEVELOPMENT

Linköping, Sweden | sabesannat359c@gmail.com | linkedin.com/in/nruthasabesan-sundara-murthy

EDUCATION

M.Sc. Industrial Engineering & Management
Innovations Domain
Linköping University
In Progress

B.Tech Mechatronics Engineering
SASTRA University
2020 – 2024 · CGPA 7.14 (First Class)

Foundation in Data Science
IIT Madras
2022 – 2024

CORE SKILLS

Business Analysis & Strategy
Requirements Gathering · Process Design · BPR · Business Model Canvas · Stakeholder Interviews · Market & Scope Analysis

Project & Stakeholder Management
Cross-Functional Leadership · Cross-Functional Coordination · Project Planning · Milestone & Risk Tracking · Budget Ownership · Client-Facing Delivery · Vendor & Supplier Liaison · MS Project

Innovation & Business Systems
Innovation Management · Project-Based Organisation · New Product Scoping · Entrepreneurship · SAP/ERP Basics

Analytics & Reporting
Excel (Advanced) · Power BI · Python · MATLAB · Data Preparation · Reporting & Documentation · Root-Cause Analysis

Process Improvement
LEAN · Kaizen · 6S

Engineering & Automation
Automation · Controls & Systems · Electrical & Electronics · Mechanical Design · Power Electronics

Technical Tools
PLC & HMI · IIoT · Embedded Systems · CAD/CAM · GD&T · FEA · Process Simulation · C/C++

CERTIFICATIONS

Microsoft Learn
Power BI · Data Analytics

MathWorks
MATLAB Fundamentals (2023) · MATLAB On-Ramp (2024)

Udemy, 2024
Basics of Automotive Electronics: vehicle components and systems
Electric Vehicle Charging: technologies, infrastructure, standards
Hardware in the Loop

LANGUAGES

English (Fluent)
Swedish (Basic)
Hindi · Tamil · French

PROFILE

Mechatronics engineer studying how organisations innovate, grow and work across functions: M.Sc. in Industrial Engineering & Management (Innovations domain), Linköping University. A technical foundation, a Foundation in Data Science and hands-on project leadership shape an approach to business problems that runs from market and stakeholder analysis to the processes that turn ideas into results.

CURRENT PROJECT WORK

Digital Battery Passport Research | M.Sc. Advanced Project Course — In progress

- Researching how firms organise cross-company data sharing for the EU Digital Battery Passport (mandatory from Feb 2027) and how startups turn it into opportunities.
- Qualitative case study: interviews with manufacturers, suppliers and startups; open innovation and entrepreneurship lenses.

PROFESSIONAL EXPERIENCE

Graduate Engineer Trainee, Automation Team | Salcomp Industries — Oct 2024 – Jun 2025

- Responsible, on the team's behalf, for Site Acceptance Testing of measurement and glue machines on two NPI projects, conducted through data collection, analysis and reporting.
- Coordinated automation, line, operations, quality, process, vendor, customer, auditor and project-owner teams.
- Analysed yield and defect data in Excel for root-cause analysis; programmed and maintained PLCs and HMIs.
- Kaizen on adaptor-line defects: ₹3M annual savings; graphite-sticking machine: ₹0.8M.

Project Lead | Crobot Technologies — Jul 2023 – Dec 2023

- Led a biomedical hardware project end to end: team, client, budget, timeline and risks.

Project Leader | i6 Technologies — Aug 2022 – Feb 2023

- Directed 8-axis and 5-axis machine assembly from design to testing; improved reliability.

Research Collaborator | Independent Research Project — Sep 2021 – May 2022

- Designed a multi-material 3D printer: material compatibility and print precision.

UI/UX Design Trainee | Trainee Program — Jan – Jun 2020

- Wireframing and prototyping for web and mobile interfaces.

ACADEMIC CONSULTING ENGAGEMENT

Business Analysis & BPR: Polar Light Technologies | M.Sc. — Feb – Jun 2026

- Analysed the market, competences and stakeholders, among other domains, using the Business Model Canvas and interviews.
- Delivered a roadmap on development, new products, innovation management and growth.

PROJECT LEADERSHIP

- Smart-H (2023–24): wearable head-and-neck protection system for two-wheeler riders.
- Digi-Steth (2022–23): digital stethoscope with heartbeat amplification and waveform display.
- 14-DOF Manipulator (2023–24): control system and GUI. Also: Agricultural Robot, SKY-C.

RELEVANT COURSEWORK

Innovation & Strategy International Business · Innovation Management · Sustainability Transition · Innovative Entrepreneurship · Project-Based Organisation

Operations & Quality Operations Strategy · Manufacturing Planning & Control (incl. Advanced) · Quality Management · Lean Production

Robotics & Automation Industrial Robotics · Autonomous Robots · PLC & Automation · Mechatronics Systems · Mechatronics System Design · Hydraulic & Pneumatic Systems

Controls & Electronics Control Systems · Digital Electronics · Power Electronics · Electrical Machines · Microcontrollers · Linear ICs

Mechanical & Automotive Automobile Engineering · Kinematics of Machines · CAD/CAM · Manufacturing Processes
